Sub: Metering of Electricity Consumption for paying & non paying consumers in Defence

It has been pointed out by the HQs that electricity bills in respect of paying & non paying consumers in defence are not being regularly issued by MES or charged at flat rates, much lower than actual consumption resulting in huge revenue loss to govt. Non recovery of electricity charges on the basis of meters is a serious issue as flat rates will be very low. This needs to be looked at for your jurisdiction.

Therefore, it is requested to furnish the following information to this office by return MAIL(ZIMBRA/NIC) on or before 31/08/2015 to appraise the same to HQs Office.

- i) Total number of Quarters/building located under your jurisdiction
- ii) Periodicity of return of recoveries in r/o Electricity charges i.e. monthly or quarterly
- iii) Whether electricity charges are charged at flat rate or actual consumption.
- iv) In case charged at flat rates, reasons thereof and action taken with executive authorities
- v) Number of cases in r/o PBORs wherein no billing is being done on the pretext of free consumers

PCDA has seen.
